Panel Session 6B: Simulation Versus Formal Verification

Coordinator: B. Schneider, microLEX Systems, Denmark
Chairman: J.-P. Tual
Panel: G. Beenker; L. Claesen; C. Berthet; and M. Thill

Will formal verification substitute simulation? What are the foreseen roles of heavy simulation or emulation versus formal verification in system design? Will solutions come from the traditional CAD vendors? And is there a chance to see formal verification successfully applied in mixed signal design in a reasonable time?
