Publications on CD-ROM: ED&TC96 is a project of the Special Interest Group for Design Automation (SIGDA) of the Association for Computing Machinery (ACM). It consists of the entire proceedings of 1996 European Design and Test Conference, 1995 European Design and Test Conference and contributed papers from The European Design and Test Conference 1994 Proceedings. Papers are accessible using Adobe Acrobat Reader 2.1 (for IBM compatible PCs, Apple Macintosh computers and UNIX platforms) and as PostScript files for use with HTML browsers and PostScript viewers.

SIGDA has long been interested in electronic publishing and in the potential for CD-ROM as an efficient data storage and distribution medium. In 1992, SIGDA published the DALibrary, an 8 disk set of CD-ROMs containing conference proceedings and one journal spanning the years 1964 - 1990. The DALibrary was a large and expensive undertaking, since the material used existed only on paper. Since that time, it has become feasible for authors to submit their papers electronically as PostScript files, which reduces the cost and preparation time, making it possible to have proceedings on CD-ROM available at the conference. SIGDA wanted to provide a service to the design automation community and in particular, provide a tangible benefit to its members. It decided to publish individual conference proceedings on CD-ROM. DAC 94 on CD-ROM, which was distributed free to all SIGDA members, was the first in a series called SIGDA Publications on CD-ROM. EURO-DAC ’94 on CD-ROM was the second. ICCAD 94 on CD-ROM, the third.

In late 1993, Jason Cong and Bryan Preas, the CD-ROM Projects directors, began investigating what retrieval software to use. Conferences in other areas have been put on CD-ROM, and Jason and Bryan spoke with their producers and sponsors to gather information. Jason and Bryan decided to use Adobe Acrobat, primarily because of its ease of use to CD-ROM developers, the authors of conference papers, and to the end user. They added HTML indices and PostScript files for UNIX users. Thus, ED&TC 96 on CD-ROM contains files which can be accessed using either the Adobe Acrobat Reader (included on the CD-ROM) or an HTML browser, such as Mosaic or Netscape (provided by the user) and a PostScript viewer, such as GhostScript or PageView.

The key to the project was the requirement that each paper accepted for a conference be submitted electronically. A server at the University of Pittsburgh was set up where papers could be submitted via ftp or email. Floppy disks could also be mailed in. Authors were requested to submit their files in PostScript, if possible. Once the papers were gathered, they were "distilled" into Portable Document Format (PDF) files using Adobe Acrobat Distiller. A few of the files could not be distilled. Those, along with papers for which we received no electronic version, were scanned from the camera-ready versions submitted to IEEE CS Press. PDF files were combined and hyperlinks were inserted. Indices were prepared and hyperlinks inserted for the HTML browser, also.
At the request of the ED&TC organizers, papers from ED&TC95 and some from ED&TC 94 are also included on the 1996 CD-ROM. Authors of papers appearing in the 1994 Proceedings were contacted and asked to submit electronic versions of their papers. Luc Claesen gathered these papers and checked them before sending them on to the SIGDA CD-ROM Project. Seventy-four papers from ED&TC 94 were received by the deadline and are included in *ED&TC 95 on CD-ROM* and on *ED&TC96 on CD-ROM*.

SIGDA plans to make proceedings from other conferences which it sponsors available on CD-ROM. SIGDA also publishes an "end of year" compendium containing material from each of that year's conference ROMs.

This Project gratefully acknowledges aid and assistance from the following people:

· The SIGDA Advisory Board, consisting of James P. Cohoon, Joanne E. DeGroat, Robert A. Walker, Michael J. Lorenzetti, Franc Brglez, Paul B. Weil, Jason Cong, Bryan T. Preas, Steven P. Levitan, Cherrice Traver, Nikil Dutt, and C.L. Liu.

· Steven P. Levitan & Yee-Wing Hsieh at the University of Pittsburgh set up and maintained the server to receive electronically submitted papers.

· At IEEE Computer Society Press, Penny Storms provided material from the hard copy Proceedings and photocopies of papers for which we had no usable files.

· Sue Menzies, CEP Consultants, Ltd., supplied conference and author information.

· On the ED&TC Organizing Committee, Arno Kunzmann helped prod slow authors into sending their papers.

· Mark Weiser and Roy Want of the Xerox Palo Alto Research Center provided printers that were used extensively by this project.

· Bill Hagen, IEEE Copyright Manager, granted SIGDA permission to use the IEEE copyrighted Proceedings in this CD-ROM.

Finally, we wish to thank our reviewers, who contributed their time and expertise. They perform an invaluable service and we are indebted to them. For *ED&TC96 on CD-ROM* they are: F.D. Lewis, Wolfgang Müller, Susan Siedun, Mircea Stan, Don Thomas, Robert Walker and Martin Wong.

As the CD-ROM Project Administrator, I wish to especially recognize Chong-Chian Koh, the Project programmer and analyst, who spends much time putting links in the files and writing the html programs. Our consultant, Cheng-Kok Koh, also deserves recognition for his contributions to the CD-ROM Project.

-- Kathy Preas
