The 14th International Workshop on Parallel and Distributed Real-Time Systems (WPDRTS’06) held in Island of Rhodes, Greece, on April 25-26 2006, brought together researchers in the domain of parallel and distributed real-time systems.

WPDRTS’06 received 48 submissions and 11 invited papers. The proceedings contain 12 papers in general sessions, and 19 papers in four special sessions on feedback control, formal methods, soft and firm real-time systems, and wireless sensor networks. The proceedings also contain the abstract of the keynote speech by Joseph Sifakis.

The Program Chairs would like to thank all authors who submitted papers, the special session organizers, the members of the Technical Program Committee and the reviewers for their hard and conscientious work, the General Chairs, the Publicity Chairs, the Publication Chair, the Submission Chair, members of the Steering Committee, and the IPDPS organization for their assistance and support.
