POHLL: Workshop on Performance Optimization for High-Level Languages and Libraries

Workshop Description:

The complexity of software development has led to many efforts aimed at raising the level of abstraction for the programmer. This includes both object-oriented general-purpose approaches and domain-specific languages and libraries. While performance considerations are not paramount for all domains, there are many domains where high performance is essential. This workshop (POHLL 2007) aims to bring together researchers from different domains who have addressed performance optimization issues in the context of high-level languages/libraries and problem solving environments, to share their successes as well as the challenges they face.

Dr. Markus Pueschel of Carnegie Mellon University is the keynote speaker at POHLL 2007. The workshop includes papers from areas such as compilation technology, optimizations and tuning for multi-core processors, domain-specific languages, library development and optimization, code generation, and problem-solving environments.

General/Program Co-Chairs:

Gerald Baumgartner, Louisiana State University, USA
J. (Ram) Ramanujam, Louisiana State University, USA
Atanas (Nasko) Rountev, The Ohio State University, USA
P. (Saday) Sadayappan, The Ohio State University, USA

Program Committee:

Eduard Ayguade, Universitat de Politecnica de Catalunya, Spain
Gerald Baumgartner, Louisiana State University, USA
David Bernholdt, Oak Ridge National Laboratory, USA
Daniel Chavarria Miranda, Pacific Northwest National Laboratory, USA
Jack Dongarra, University of Tennessee, USA
John Gilbert, University of California, Santa Barbara, USA
Jeremy Johnson, Drexel University, USA
Calvin Lin, The University of Texas at Austin, USA
John Mellor-Crummey, Rice University, USA
Jarek Nieplocha, Pacific Northwest National Laboratory, USA
David Padua, University of Illinois at Urbana-Champaign, USA
Keshav Pingali, Cornell University, USA
Markus Pueschel, Carnegie Mellon University, USA
J. (Ram) Ramanujam, Louisiana State University, USA
Atanas (Nasko) Rountev, The Ohio State University, USA
P. (Saday) Sadayappan, The Ohio State University, USA
Rob Schreiber, Hewlett Packard Laboratories, USA
Rich Vuduc, Lawrence Livermore National Laboratory, USA
Trey White, Oak Ridge National Laboratory, USA
Qing Yi, The University of Texas at San Antonio, USA
